Telegram: 51982896555

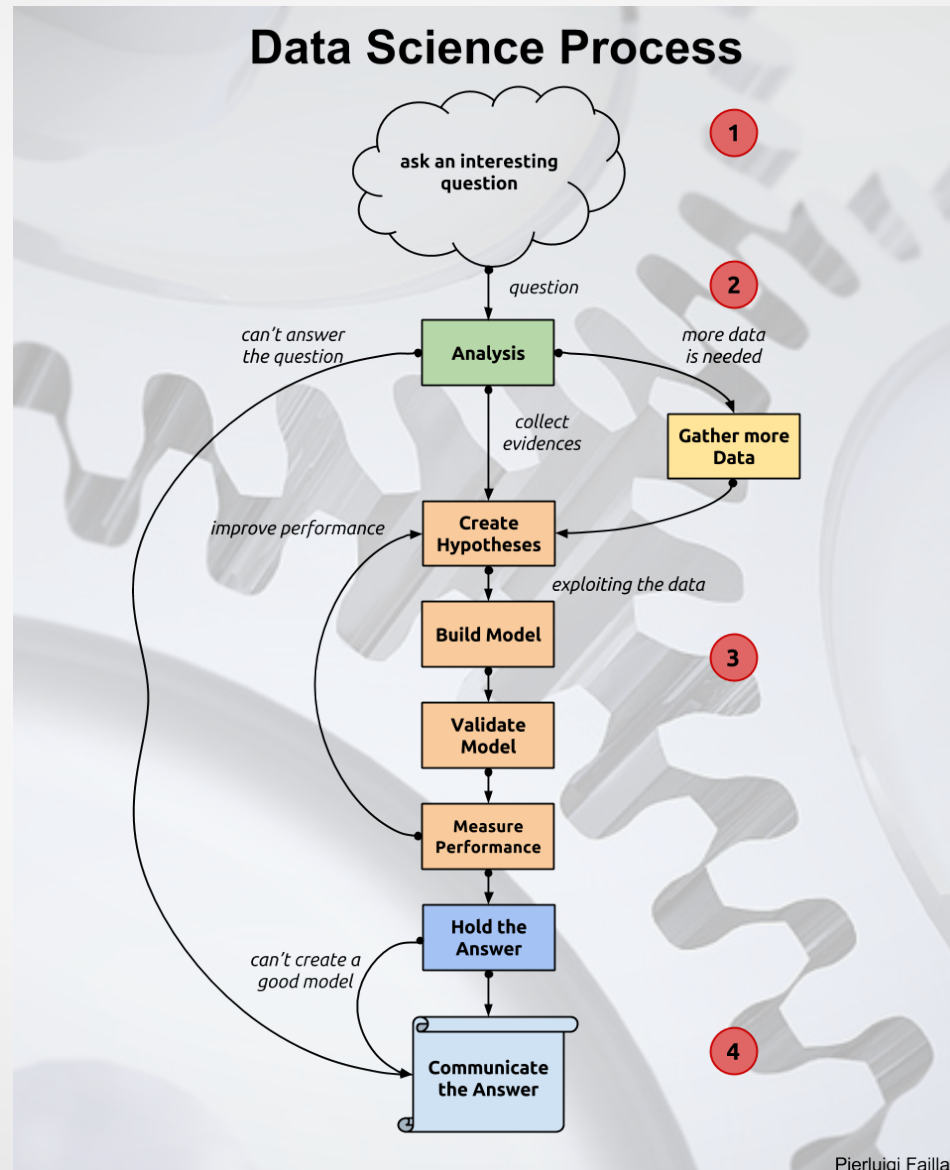

Perfil

- Geanderson Lenz (@geanderson)
- Spark Data Science (sparkproject.me)
- Professor de Administração (Instituto Federal)
- Mestre em Métodos Quantitativos na Gestão (PUCRS)
- Bacharel em Administração (UniRitter)
- Projetos de Data Science em R
- Consultoria de Business Intelligence (BI) com foco em Análise de Dependências (SEM)
- Python Lover

Distribuição Normal

Data Science

Detecção de Fraudes

1. Cartão de Crédito
2. Ecommerce
3. Cargas
4. Transações Financeiras
5. Compras
6. Movimentação de Estoques

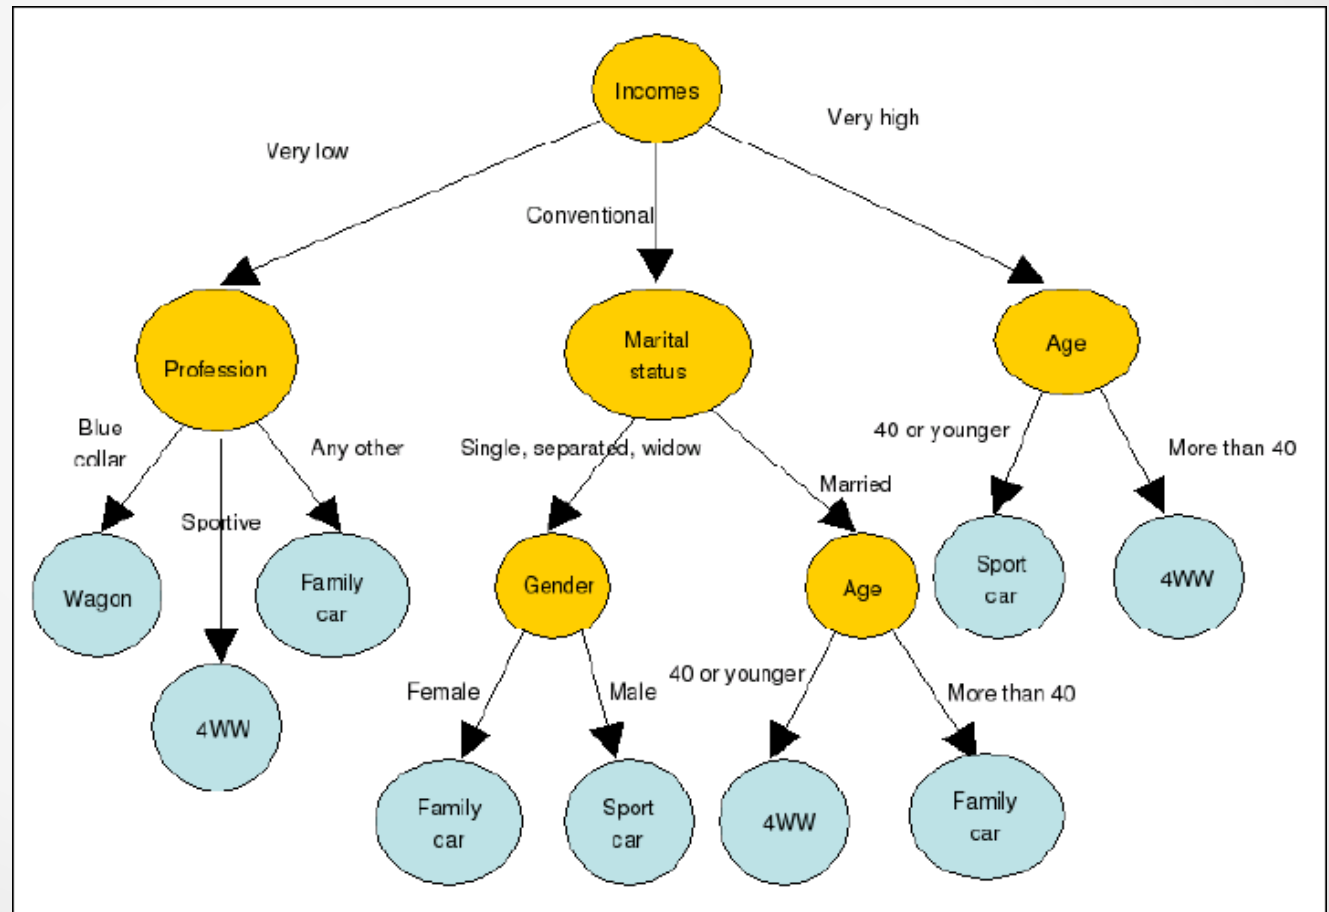

Algoritmos

- Naive Bayes
- SVM
- t-SNE

Segmentação de Mercado

- Geográfica
- Demográfica
- Psicográfica
- Comportamental

Naive Bayes
Random Forest
Boosted Trees
K-NN

Sistemas de Predição

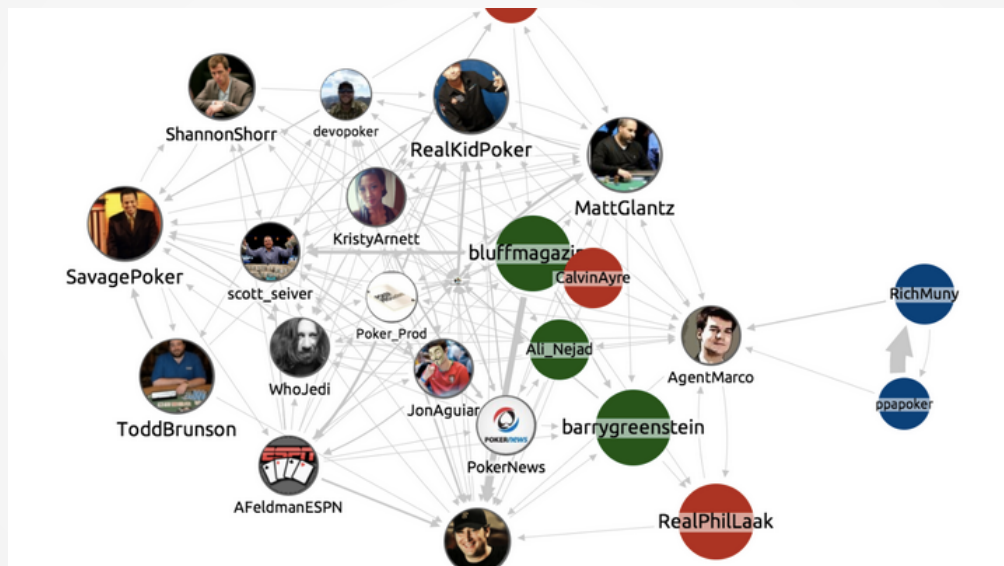

- Vendas
- Receitas
- Custos
- Manutenção

- Regressão Linear
- Regressão Múltipla
- Equações Estruturais
- Regressão Logística
- Ensemble Methods

Clusters

- Análise de Redes Sociais
- Pesquisa de Marketing

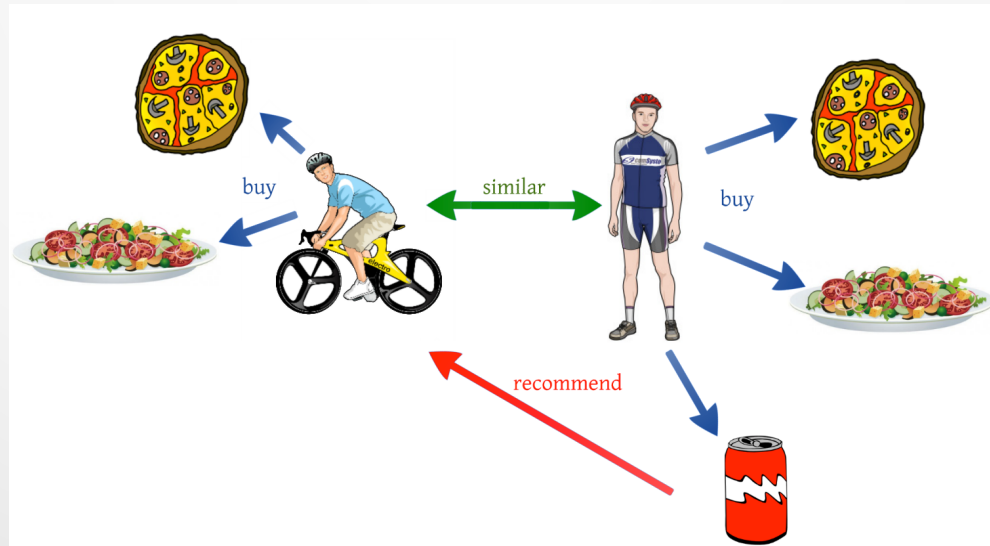

Artificial neural network (ANN)
Nearest neighbor search
Neighbourhood components analysis
Latent class analysis
Affinity propagation

Sistemas de Recomendação

- Aplicações Web
- Chatbots
- Serviços
- Conteúdo vs Colaborativo

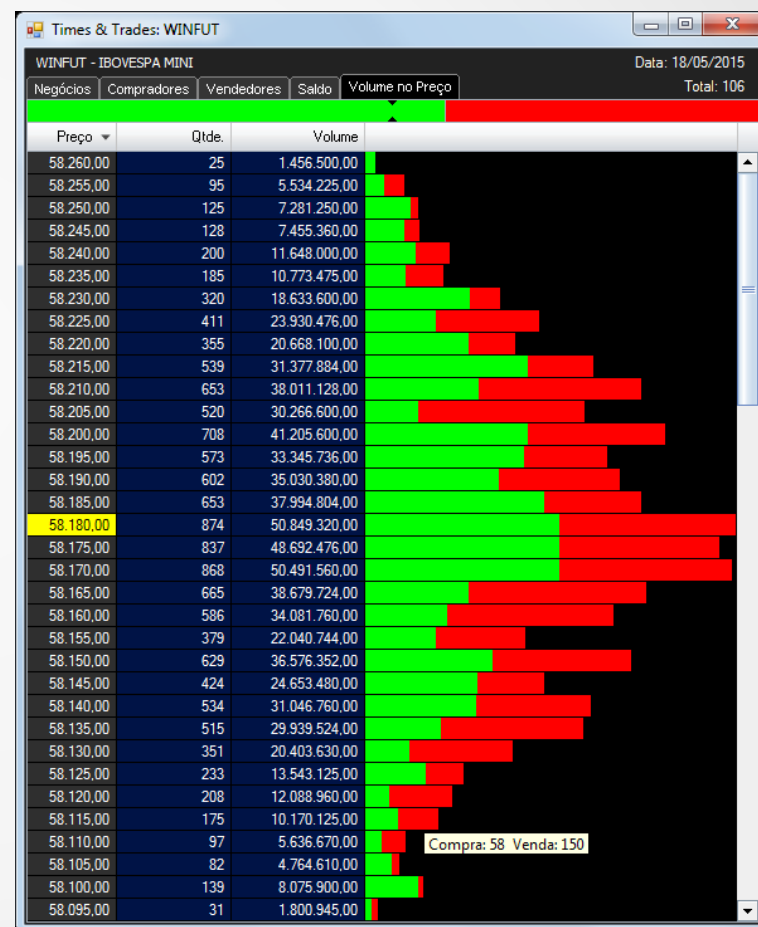

Python-recsys
GraphLab
Surprise

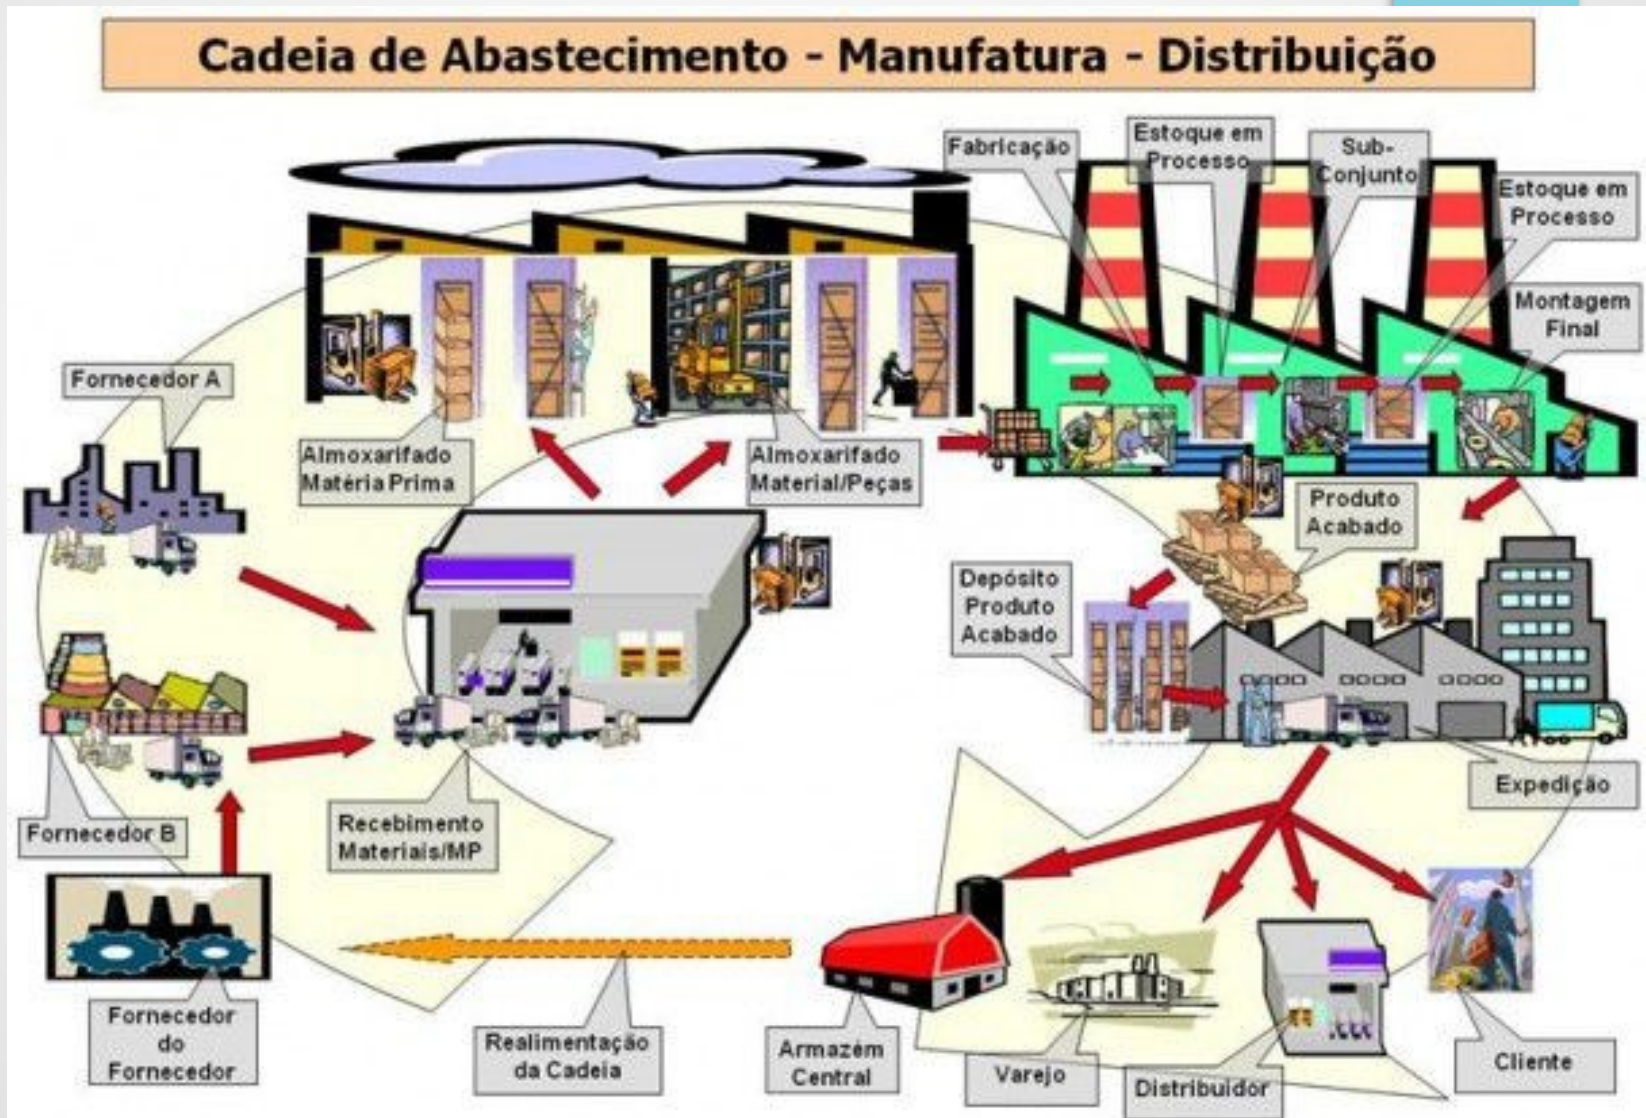

Finanças

- Financiamentos e Investimentos
- Custos
- Governança Corporativa
- Análise de Crédito

Deep Learning
Gradient Boost
Econometria
Cluster Hierárquico
Random Forest
Supervised Vector Machine

Cadeia de Suprimentos

Cadeia de Suprimentos

Moving from a national stocking model to a hub-and-spoke model with 55 shipping and 161 selling locations

A 250% increase in physical locations

450,000 SKU-Locations consisting of both **parts and finished goods**

High product availability targets-
Some customers need 'Same Day' pickup

Highly variable independent demand

Highly seasonal demand
(AC and heating)

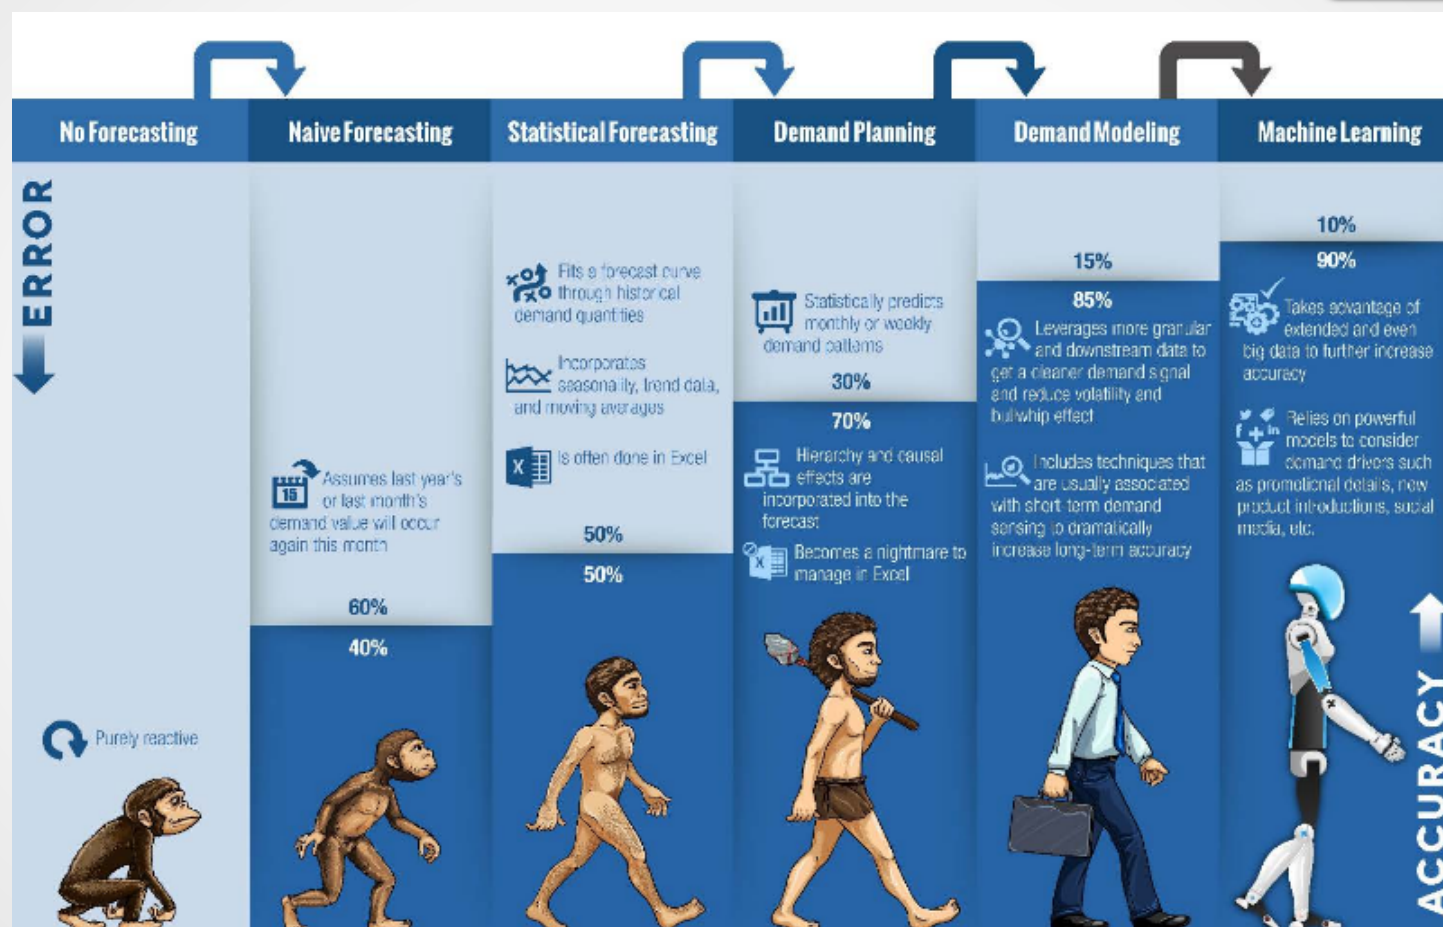

Many new product introductions

Boeing Supply Chain

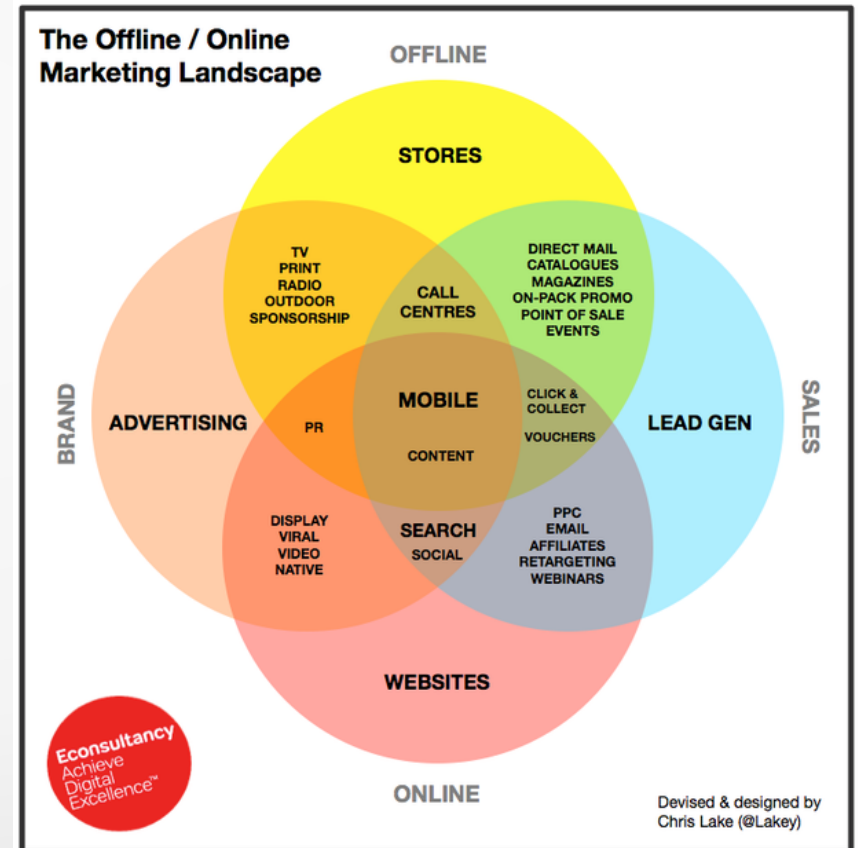

Previsão

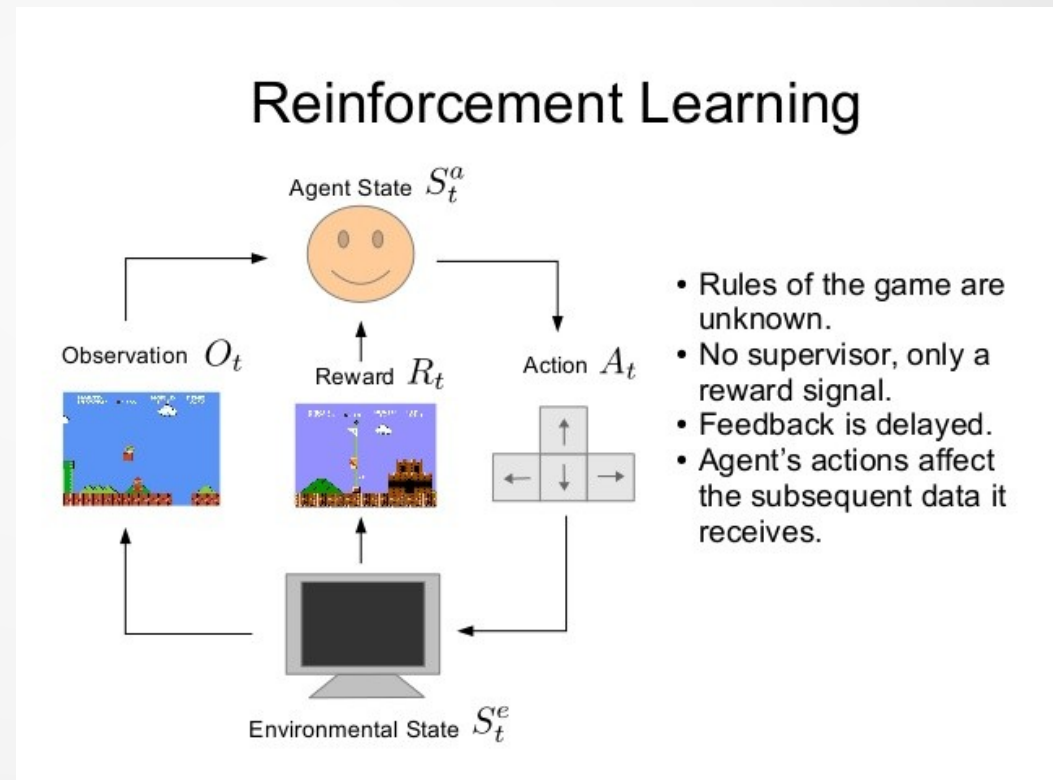

Marketing

- Personalização e Customização
- Atendimento (ChatBot)
- Comportamento de Compra
- Fluxo de Visita Web
- Mobile App Usage
- Resposta a Campanhas
- Interações no Varejo

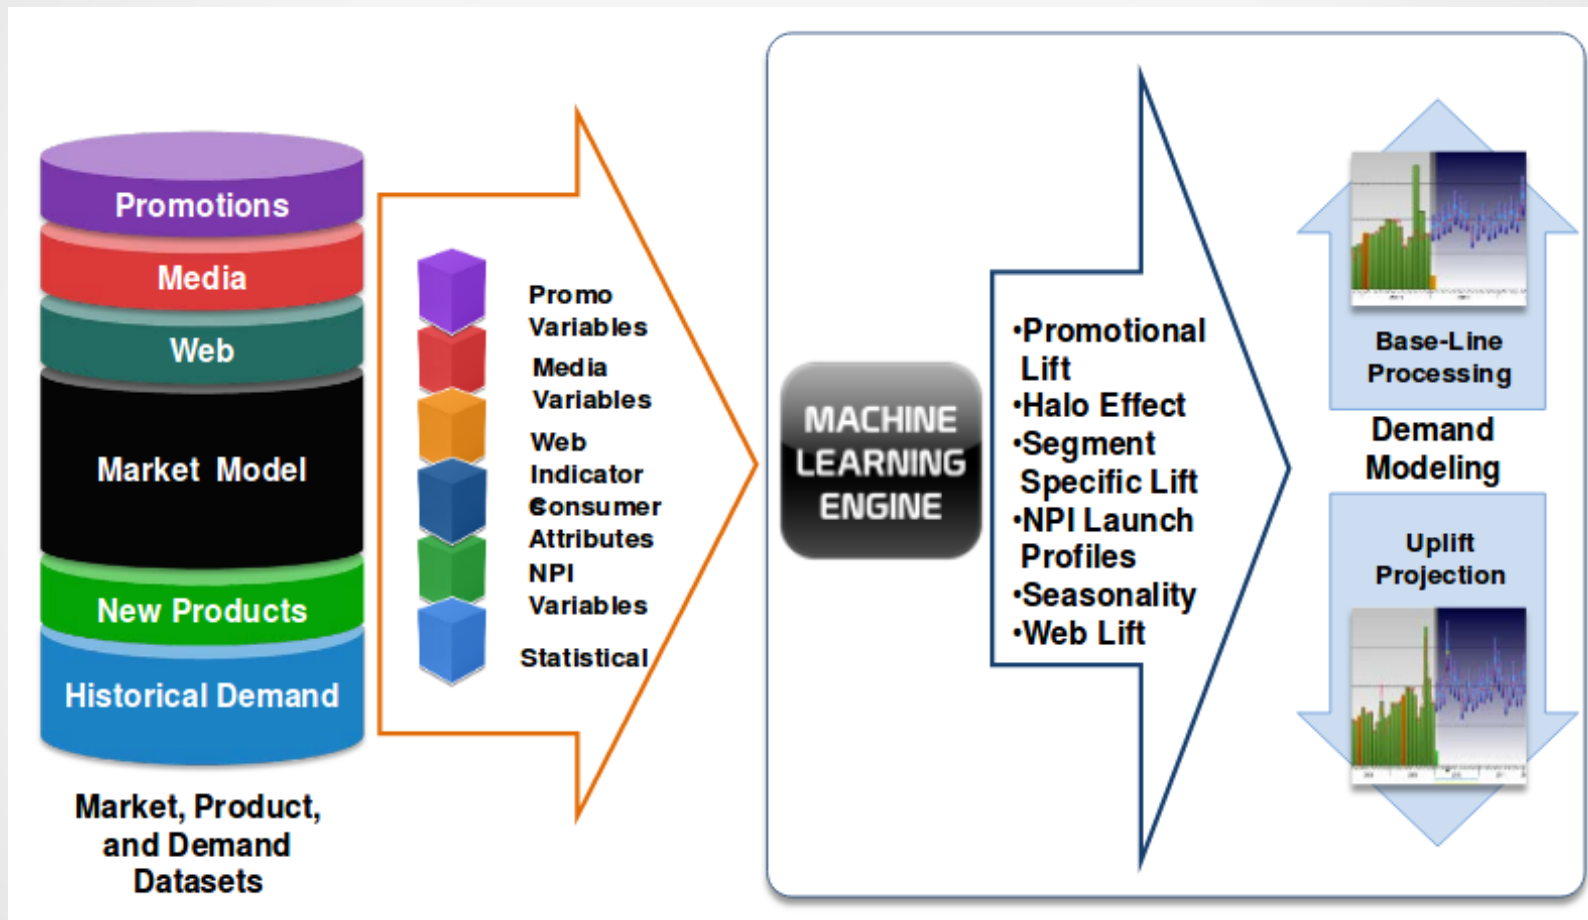

Algoritmos Marketing

- Natural Language Processing (NLP)
- Deep Learning
- Random Forest
- K-Means
- Reinforcement Learning

Marketing

How Danone Used Predictive Commerce to TRANSFORM THEIR BUSINESS

DANONE'S PLANNING PROCESSES WERE DISCONNECTED AND DISJOINTED

PREDICTIVE COMMERCE ENABLED A COHESIVE PLANNING PROCESS TO IMPROVE DANONE'S FORECASTS

RESULTING IN A SIGNIFICANT IMPROVEMENT IN GROWTH AND RETURN ON INVESTMENT

Managing demand volatility puts significant pressure on supply chain KPIs. **PREDICTIVE COMMERCE** is the key to meeting KPI challenges by analyzing both upstream and downstream data from internal and external sources of data – to produce surprisingly accurate forecasts.

www.toolsgroup.com

Demand Shaping KPIs

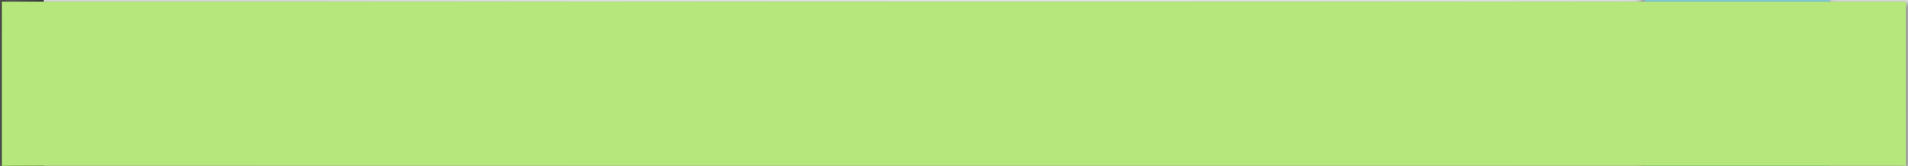

Beyond the Numbers

Across the Board Improvements

37 consecutive months have exceeded 98.7% service level goal

Big data (Data Science) is like teenage sex:
everyone talks about it,
nobody really knows how to do it,
everyone thinks everyone else is doing it,
so everyone claims they are doing it...
